

Sprott Junior Uranium Miners ETF (Nasdaq: URNJ) is the only[^] ETF to provide pure-play^{^^} exposure to small, exploration- and development-stage uranium miners with the potential for revenue and asset growth. **URNJ** seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the Nasdaq Sprott Junior Uranium Miners™ Index (NSURNJ™), which is designed to track the performance of mid-, small- and micro-cap companies in uranium mining-related businesses.

[^] Based on Morningstar's universe of Natural Resources Sector Equity ETFs as of 3/31/2025.

^{^^} The term "pure-play" relates directly to the exposure that the Fund has to the total universe of investable, publicly listed securities in the investment strategy.

Key Points

- 1. Pure-Play Junior Uranium ETF** – The only pure-play ETF focused on small uranium miners, with the potential for significant revenue and asset growth.
- 2. Uranium Bull Market** – A new uranium bull market is likely underway as demand outstrips supply, nations seek energy security and prices have the potential to increase—incentivizing miners to explore and develop new uranium mines.
- 3. Critical Material in Meeting Energy Demand** – Uranium and nuclear energy may be critical to meeting the world's expanding need for electricity, and countries recently committed to tripling global nuclear energy capacity by 2050 to reach net-zero goals.
- 4. Supporting Energy Security** – Uranium and nuclear energy provide reliable, affordable electricity that may help countries achieve energy security.

IMPORTANT DISCLOSURES & DEFINITIONS

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a Sprott Junior Uranium Miners ETF Statutory Prospectus, which contains this and other information, visit <https://sprottets.com/urnj/prospectus>, contact your financial professional or call 1.888.622.1813. Read the Prospectus carefully before investing.

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. The Fund is not suitable for all investors. The Fund is non-diversified and can invest a more significant portion of assets in securities of individual issuers than a diversified fund. As a result, changes in a single investment's market value could cause more significant share price fluctuations than in a diversified fund.

Shares are not individually redeemable. Investors buy and sell shares of the Sprott Junior Uranium Miners ETF on a secondary market. Only market makers or "authorized participants" may trade directly with the Fund, typically in blocks of 10,000 shares.

Funds that emphasize investments in small/mid-cap companies will generally experience greater price volatility. Diversification does not eliminate the risk of investment losses. ETFs are considered to have continuous liquidity because they allow an individual to trade throughout the day. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses, affect the Fund's performance.

The Sprott Junior Uranium Miners ETF seeks to provide investment results that, before fees and expenses, generally correspond to the total return performance of the Nasdaq Sprott Junior Uranium Miners™ Index (NSURNJ™).
